

Conduit Connector Brackets

The Acroba Conduit Connector Brackets are designed to provide a secure, easily installed connection for flexible and tube conduit.

There are 3 different brackets which can be mounted on the side or at the bottom of a basket tray. The brackets have a double slot to accommodate a conduit connector in M20 or M25. All brackets are made from pre-galvanized steel for corrosion resistance. Fixing to the tray is simple. Lugs on the brackets are bent over the tray wires to form a secure connection.

Type CCL2 is supplied with a fixing screw which connects to the bottom wire of the tray.

CCB50 Bottom mounted for basket tray 50mm wide

Art. nr.
CCB50

CCB1 Bottom mounted for basket tray 100mm – 600mm wide

Art. nr.
CCB1

CCB2 Side mounted for basket tray type AF2, 54mm high

Art. nr.
CCB2
