# Perimeter Systems

## Skirting Trunking

Flytec skirting trunking is supplied in 2 metre lengths, comprising a galvanised sheet steel body with powder coated overlapping lid, white as standard. A cover strap is provided with each length lid. This reduces the necessity for special on-site cutting requirements, the strap covering any cut edges.

20mm knockouts are provided in the partition at 250mm centres. This allows easy positioning of outlet plates, which require screening via the steel back box that fixes to the partition.

Chamfered or flat top options as standard. Other powder coated finishes are available even when only a short run of trunking is required.

2 or 3 compartments are most commonly used however systems to suit client's individual requirements can be manufactured within the same short lead times.

## Dado Trunking

Flytec dado trunking is supplied in 2 metre lengths. Manufactured to the same high quality as our skirting trunking it is designed to be installed around the perimeter, above floor level, thus allowing optimum use of floor space.

Chamfer top, flat top or double chamfer options available as standard.

20mm knockouts are provided in the partition at 250mm centres. This allows easy positioning of outlet plates, which require screening via the steel back box that fixes to the partition.

Other powder coated finishes are available even when only a short run of trunking is required.

2 or 3 compartments are most commonly used however systems to suit client's individual requirements can be manufactured within the same short lead times.

## Bench Trunking

Flytec Bench trunking is supplied in 2 metre lengths. It comprises of a single compartment angled body with a powder-coated lid, white as standard. Each length and accessory is supplied with an internal connector.

This easy to install system offers a practical solution to provide services on benches and desks, commonly used in laboratories, workshops and schools/colleges.
